News in Brief Form Fire Suffocates

Local Items and Happenings of General Interest
---Mostly Personals

Mrs. O. Hinds entertained a
number of her friends Monday
evening.

Mrs. Foley had a few friends
in for cards Wednesday evening.

Dr. Leavitt, chiropractor, has
closed his office and gone to the
States.

Appeal is being made through
circulars for aid to starving Rus-
sian children. Read it. Any
contributions will be forwarded
to headquarters by Rev. Ketty,

Auto license plates now on
hand. Call on Mr. Wylie, F. C.
Bliss, Osgo.

R. Jarrett has gone to Edmon-
ton for medical attendance.

Messrs. Wylie, McLeod and
Chapman attended the Masonic
lodge at Youngstown Tuesday.

In an interview with H. H.
George, of Collingwood, he informed
us that his flag which scored
first at Edmonton tested out 97
points out of a possible 100.

Our local weather prophet sees
less than 25 bushels of wheat
to the acre this year. He stakes
his reputation on this to the
position of the wind on Tuesday.

Premier Greenfield has an-
nounced that the government
would undertake an investigation
of the price of gasoline.

It has been announced that
there will be a fall session of the
legislature, probably in Novem-
ber, for the purpose of passing
upon a provincial income tax.
The members will not be paid
extra indemnity for this special
session, it is announced.

The inspector of the Dominion
police was in town on Tuesday
and inspected the local detach-
ment.

Adam Mart returned on Mon-
day from a trip north where he
succeeded in obtaining an ex-
cellent grade of oats for the mu-
nicipality at a reasonable price.

The new tax recovery act has
been passed and will come into
effect July 1.

New provisions for fighting
pests are being passed by the
house. These new provisions
will put obligations on farmers
to destroy pests found on their
farms, and will give right to gov-
ernment officials to enter upon
land to take such action as may
be necessary for the destruction
of pests. Provision is made for
supplying of poison which may
be secured through municipali-
ties free for use on farm lands,
and at cost price for use of rail-
way rights of way, roads or irriga-
tion ditches. Mixing stations
and distributing centers are pro-
vided for.

Popular Farmer

John Leggett, Collingwood,
loses life when his
House Gets Afire

The town and district were
almost dumbfounded on Monday
when word was sent in that one
of the most respected farmers in
the person of J. Leggett, had lost
his life in a fire that had partially
destroyed his residence.

How the fire started is not
known and it must have been
shouldering for some time and
the smoke had suffocated the不幸
fortunate man before flames broke
out near the roof.

J. M. Davis first noticed the
peculiar form of the smoke when
he was going to his barn, so he
saddled his horse and went directly
to the scene. When he arrived,
he, with three other men who had also noticed it, broke in
a south window, and proceeded
to put out the fire which was
burning on the ground floor,
when, without warning, the ceiling
gave way and the spring and
a blanket with Mr. Leggett's
body, badly burned, dropped to
the floor.

That was the first intimation
of the presence of the occupant
in the house as it was thought
that owing to it being about 10
a.m. that Mr. Leggett had gone
to town.

The deceased had only recently
returned from the east, having
left Mrs. Leggett to follow later.

The remains were taken to
Youngstown, where the funeral
takes place today, interment being
made in the Youngstown
cemetery.

The sympathy of the entire
community goes out to the relatives
in their bereavement.

Success of Spring Rye Feed

(By N. F. Marcy)

At the present time there is a
shortage of feed throughout the
country and even with this feed
coming in, free from freight
charges, it still is very costly.
While it takes a whole season to
produce grain, every farmer
might produce his own green
feed for use early in the summer
by seeding some spring rye.

I have grown this crop for the
past two years and believe that
every farmer should have at least
10 acres to use as green feed during
the summer. Because of its
rapid growth and the succulent
nature of the young plants, it also
makes excellent pasture, especially
for milk cows. During each of the past two years I have
been able to cut a good crop,
with the binder, in six weeks
from the date of seeding. If the
crop is cut before it is too far ad-
vanced, a second crop almost
equal to the first will be ready
about a month later. When
seeded sufficiently heavy, from
forty pounds to a bushel per acre,

Our New Samples For Spring Suits

have arrived. Prices are greatly reduced and quality
much superior to last year's. We are agents for
Hobbs and Randall & Johnson. Now is
the time to secure your new spring suit.

Grocery Prices Have Been Reduced During the Last Few Days

Results Of Investigations Showing The Milling Value Of Western Wheat Varieties

Report which summarized the results of investigations conducted by the old husbandry department of the University of Saskatchewan during the past eight years has been prepared by Manley Champlin and Cyril H. H. and submitted to Dean W. M. Ford. This report shows the milling value of all the important varieties of wheat grown in Saskatchewan and many of less importance which have been tried at the husbandry plots at Saskatoon. Upon which these investigations were based were grown at such a time that they are all connected with another as far as variety is concerned.

As a result of this investigation it was found possible to divide the wheat varieties into groups according to their milling value. Group No. 1, having the highest milling quality, includes Marquis, Red Fife, Kitchener and Red Bobs. Group No. 2, having fairly good milling quality, not equal to those above mentioned, includes White Bobs, White Fife and Taylor's Wonder.

Group No. 3 consists largely of medium wheats. These have not usually given as favorable milling results as the second group. Group 3 includes Preludio, Pioneer, Chelsea and Preston. The Preston being the only one in this group which is commonly grown. Group 4 includes the Ruby variety only. This variety has given such contradictory results that it is placed in a special class by itself and will be further investigated before definite conclusions can be arrived at as to its proper rating. Group 4 includes Club, Redstone, Alaska and Kline. These wheats are of undoubted poor quality so far as producing flour suitable for the manufacture of bread is concerned. Club wheat is the only one in this group which is commonly grown and, so far as has been determined, it is grown in but one or two localities in Saskatchewan at the present time. Alaska is the name given to a frequently exploited type of wheat which has been advertised as a remarkably high-yielding variety, but it has never been widely grown because of its poor milling quality and lack of resistance to disease.

Group 6 includes the amber durum varieties, among which are Kubanka, Acme, a selection of Kukim which is unusually rust-resistant, Pflissler, a black-bearded white flour durum wheat, which, like the Acme, is decidedly rust-resistant. Of this list of varieties, Kubanka is by far the most commonly grown at the present time. Acme is to be tested at five different points in the province this year, under the supervision of the field husbandry department. The other varieties are less common. Milling investigations of durum wheat are rather meager, but such as have been conducted indicate quite clearly that there is considerable variation in the value of the different varieties of this group.

Group 7 includes Red Durum (D-5), which belongs to the durum group, but is dark red in color, resembling the Red Fife in some respects. It can be distinguished from any of the bread wheat varieties by the fact that it has no brush on the kernels. The milling quality of this wheat has been investigated in the United States and found to be very poor. For that reason it is recommended that it would be better not to introduce it into Saskatchewan for fear that it may become mixed with the high quality varieties which are now grown.

Upon the whole, this report substantiated the conclusion that farmers who are growing Marquis, Red Fife, Red Bobs or Kitchener among the bread wheats are making no mistake, and that those who are growing Kubanka of pure type among the durum wheats have selected the best available variety so far as milling quality is concerned.

The factors considered in studying the milling have been loaf volume, color and quality of bread, color and texture of flour, shape of loaf, general appearance and the amount of water absorbed. All of these factors are clearly shown in the report, and complete tabulated data are included, showing reasons upon which the conclusions are based.

The milling qualities of Saskatchewan wheat are pre-eminent. Whether or not this virtue can be capitalized and made to bring returns to the province, depends upon two factors: First, the ability of the growers to continue to grow high quality milling wheat of dependable varieties; and, second, the ability of the marketing organizations, including elevator companies, the milling interests and the co-operative organizations.

Persons who are concerned with the marketing of wheat in this province, to advertise and to make known the fact that Saskatchewan wheat is of excellent quality and to secure the premium which such wheat deserves and for which the consumer will gladly pay if he can be convinced of its quality and be definitely assured of receiving the genuine article.

Early and Late Layers

Heads that Start Laying Early in the Winter are Most Profitable

Under the supervision of the Dominion Poultry Husbandry experimental farms have made at the Central Experimental Farm, Ottawa, to determine which hens would lay during the summer months; also to ascertain if there is any relation between winter and summer laying, that is to find out if a hen that lays during the winter will be more likely to lay better or worse during the summer than a hen that fails to lay during the winter months. It has frequently been claimed that a hen will lay just as many eggs whether she starts in November or April. On the contrary, these experiments show that the pullet which does not start to lay until near spring never catches up with one that begins in November or December. To help solve the problem the pullets and hens in these experiments were divided into three groups—those that started to lay in November, those that started in January, and those that started to work in February. The birds that started November laid in that month and December an average each of 14.8 eggs and for January and February averaged each 14.5 eggs and for the four summer months averaged 30.1. The February group averaged in February and March 21.75 eggs and for the four summer months 27.5. This appears to indicate that the earlier the bird begins to lay after November 1, the more eggs will she be responsible for in the year and, especially in the summer months. It is also generally conceded that the hen that lays late in the fall—not molting until near winter—is the heavier layer. It is not a good plan to kill in the autumn those hens that are not fully feathered, as they are usually the best layers.

Planting Potatoes

How and When the Work Should be Done

The best time for planting potatoes varies in the different parts of Canada owing to climatic conditions. Much depends on the condition of the ground and spring frosts, but when these have not to be considered the earlier the potatoes are planted the larger the crop is likely to be. At this juncture advice given by the Dominion Horticulturist, Ottawa, in his bulletin on "The Potato and its Cultivation in Canada," will well repay perusal. First of all the soil should be well prepared before planting. Spring ploughing is recommended. Unlike some crops that succeed best when the soil is moderately firm when ready for sowing the potato is most successful when the soil is loose. If green manure is ploughed under immediately before planting, especially on light soils, the soil should be given extra tilage so as to thoroughly incorporate the manure with the soil and keep the first few inches from drying out. Many experiments have been made to determine the best kind of sets to plant and, on the whole, it has been found that good marketable tubers cut into pieces so as to have at least three good eyes to a piece, and a liberal amount of flesh, are the best. The sets that are sown and planted after the potatoes have been cut, and the quicker they are covered, the larger the yield will be. Covering the sets with hand plaster or lime increases the yield. The most economical depth to plant is from four to five inches for good healthy sets.

Alone in Glass

Construction of the Roma leaves both the army and navy without ships larger than the navy blimp. There is not now in the United States a right or semi-right craft even faintly resembling the German Zeppelin that harried London time after time during the world war. The Z.R.1 is under construction by the navy, but even and recently arrangements were made with the co-operation of the Aligned Governments that the Zeppelin plant in Germany should build for the navy a Zeppelin of the L type, which proved successful during the war.

Armenia was the first country embracing Christianity.

Earth's Climatic Changes

New Theory is Offered by a British Scientist

A new theory has been offered by Dr. Harlow Shapley, an English scientist, relating to the mystery concerning the climatic changes on the earth over millions of years. According to this theory, the earth has been cooled during long periods, when the sun, the earth and the other planets were passing through regions of space filled with clouds of dust or dark, nebulous material, which cut off enough of the sun's heat to freeze most of the globe. At other times, apparently, the solar system moved through a region of space almost entirely free from such material, so that the sun's rays heat with full force on the earth, probably making the polar regions pleasant and the rest of the earth unusually hot. At present the sun is apparently moving through a part of space thinly scattered with interplanetary materials.

A few million years ago, according to Dr. Shapley, the earth, the sun and the other planets were moving through a mucus which is observed by astronomers in the constellation of Orion. This is one of the most variable black patches or "coal-sacs" in the sky, the name of which may be detected by the naked eye. Behind this veil in Orion are 70 faint stars which vary in intensity. They average about 700 light years (about 180,000,000,000,000 miles) from the earth, which is a moderate distance astronomically, and many of them would probably be very bright, except for the curtain of dark material hung between them and the earth.

Attacks the Popular Magazines

Declaring that he "doubted much" the cry "better the movie than the book," Dr. J. Gordon Lang, dean of the faculty of arts of McGill University, delivered an attack upon popular magazines, which he asserted were destroying a taste for good literature on this continent, in his address before a meeting of the Principals' and Teachers' Association of Suburban Schools. Dr. Lang affirmed that the schools merely follow the popular trend, the goal being pointed out to the young of financial success and "the schools have adapted their courses to the popular demand."

Alberta Farmers Erecting Silos

One hundred silos will be erected in the province of Alberta next year, according to S. G. Carlyle, livestock commissioner, who has been traveling through the province with the Livestock demonstration car. Farmers have come to have an increasing realization of the better feeding qualities through the use of silos and they are being erected widely.

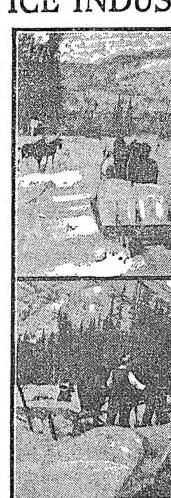

Great Demand for B.C. Land

So great is the demand for information from outside sources on the possibilities of establishing new industries and securing farmland in British Columbia that the "Buy B.C. Products" Bureau of the Board of Trade finds it necessary to add two new sections to its organization.

Captures Butter Prize

Echo Syria Laura Sanrio, two-year-old heifer, owned by Wallace D. Wright, of Brockville, Ont., has captured the Canadian championship in a butter test. She produced 34.26 pounds of butter in seven days.

ICE INDUSTRY AT BANFF

ICE OPERATIONS ON BOW RIVER AT BANFF

The winter season at Banff, Alberta, gives opportunity for the promotion of an extensive ice industry. It is unique as the only industry of its kind west of Selkirk, Manitoba. The ice field on the Bow River is a large industry in the winter time. It is a tract two miles in length and is leased for ten-year periods. Operations begin as soon as the river freezes over, in the case given to the space of a year of snow. The ice is marked by a line two inches deep to call 22 by 44 inches. An ice channel is made at one side of the river, the cakes are floated up to a beach for loading.

British Columbia is thus supplied with ice. It is used in the Okanagan Valley, at Kamloops, and the coast cities. It is of great service in caring for British Columbia fruit such as in refrigerator cars, and is used on dining cars as the purest ice that can be obtained.—C. G.

Silk Farming

Ontario Man Starts Industry With 500 Mulberry Trees

Silk production promises to be a new industry for Ontario and Quebec farmers. Five hundred mulberry trees suited to requirements of the silk worm were planted in Middlesex County, Ontario, last autumn. By experimenting a tree has been produced which is adapted to the climate of Canada and United States. It bears no seed or berry, being grown solely for the leaf, and is the result of very careful grafting of mulberry cuttings on osage orange roots. Athol Harris, of Berry, London Township, Middlesex County, imported 500 trees from New Orleans, and planted them. He has also ordered 500 more as he has set apart five acres for their development. These trees cost \$1.25 each if 1,000 are purchased, but all that have been planted are doing splendidly. Mr. Harris states he will be satisfied if he realizes \$100 per acre this year.

Former Kaiser Stands For National Anthem

"God Save the King" Brings Wilhelm to His Feet

The "spectacle of former Kaiser Wilhelm, in full dress uniform, bristling with medals, standing at attention while an orchestra played "God Save the King" was granted a few privileged visitors to Count Bentwich's private motion picture show. At the Kaiser's invitation, the former Kaiser, his moustache now snow white and lacking somewhat its former aggressive tilt, but proud and haughty of bearing as ever, went with his staff to watch an exhibition of the late Sir Ernest Shackleton's previous South Pole expedition.

When the film reached the place where the hoisting of the British flag over the southernmost possessions of Great Britain was shown, the orchestra played "God Save the King," and the audience, including the former Kaiser, clapped.

Great Demand for B.C. Land

So great is the demand for information from outside sources on the possibilities of establishing new industries and securing farmland in British Columbia that the "Buy B.C. Products" Bureau of the Board of Trade finds it necessary to add two new sections to its organization.

Captures Butter Prize

Echo Syria Laura Sanrio, two-year-old heifer, owned by Wallace D. Wright, of Brockville, Ont., has captured the Canadian championship in a butter test. She produced 34.26 pounds of butter in seven days.

Silage Crops Can Be Safely Stored In An Economical Trench Silo

At the recent dairymen's convention at Regina, Mr. G. H. Hutton, superintendent of agriculture and animal industry of the C.P.R. department of natural resources at Calgary, gave an interesting description of a trench silo. He said:

"During recent years it has not been a very serious problem to make money in dairying, inasmuch as the price of butter and cream and whole milk have been ruling relatively high during that time, and the man who gave his business the serious consideration which it should receive has been able to show a satisfactory return on his investment."

"However, with the decline in value of all dairy products which has taken place during the last 12 months, and which, according to certain forecasts will continue for another six months, the question of reducing costs of production becomes a very live and important problem."

"Cattle give best results when supplied with an abundance of succulent fodder. June pastures have frequently been named as the ideal condition for economical production of milk and beef. If by a system of pickling grasses or similar fodders we can make them available for a much longer period, even during the entire season when good grass is out of season, we will have accomplished a result which will contribute toward the production of maximum quantities of milk and butter at minimum costs. Such a result can be achieved by the use of silos and silage crops."

"The silo, however, will set aside some of the objections which might be raised to the use of silage crops. First, it is superior to corn for dry areas as it outyields that crop during years of low precipitation. It is a crop which responds quickly to an increase in rainfall or to irrigation as we have seen yields of over 34 tons a half tons of silage to the acre on irrigated ground, while this season we secured a yield of 12 tons to the acre on dry land and during a very dry season. Second, on the other hand the sunflower crop germinates and grows at a lower temperature than grass and resists frost in spring and fall, thus enjoying in this climate a longer life than grass as we have seen yields of over 34 tons a half tons of silage to the acre on irrigated ground, while this season we secured a yield of 12 tons to the acre on dry land and during a very dry season. Second, on the other hand the sunflower crop germinates and grows at a lower temperature than grass and resists frost in spring and fall, thus enjoying in this climate a longer life than grass as we have seen yields of over 34 tons a half tons of silage to the acre on irrigated ground, while this season we secured a yield of 12 tons to the acre on dry land and during a very dry season. (Continued)

James and Flora and Frank—and even Jane!—said that they would like to have one of the Blaisdells' books, when they were published, to hand down in the family. Flora took out her purse and said that she would pay for her book, but Mr. Smith wouldn't have it, and with some evident embarrassment, refused the money, saying that he could not tell yet what the price of the book would be.

All the Blaisdells, except Frank, Fred and Bebe, went to the station to see Mr. Smith, and they all wanted to. They told him he was just like one of the family, anyway, and then declared they hoped he would come back soon. Frank telephoned him that he would have gone, too, if he had not had so much to do at the store.

Mr. Smith seemed pleased at all this attention—he seemed, indeed, quite fond—but he seemed also embarrassed, during those last few days at Hillerton.

Miss Maggie Duff did not go to the station to see Mr. Smith off. Miss Flora, on the contrary, stopped at the Duff cottage and reproached Miss Maggie for the delinquency.

"Nonsense! Why should I go?" laughed Miss Maggie.

"Why shouldn't you?" retorted Miss Flora. "All the rest of us did, that's all."

"Well, that's all right. You're Blaisdells—but I'm not, you know."

"You're just as good as one, Maggie Duff," said Fred. "I hasn't that man boarded here for over a year, and paid you good money, too?"

"Why, yes, of course."

"I've been in public life today who is more—"

"Nonsense! Flora!"

"Well, then, if—Why, Maggie Duff, you're blushing! You're blushing, Miss Maggie! You're blushing, for heaven's sake! That's the way that did not seem to lessen the unmistakable color that was creeping to her forehead. "You are blushing! I declare, if you were twenty years younger, and I didn't know better, I should say that!" She stopped abruptly, then plumped on a new counterpane suddenly alight with a new color. "Now I know why you didn't go to the station, Maggie Duff! That man probably thinks you and you refused him!" she shrieked.

"Flora!" gasped Miss Maggie, her face scarlet.

"He did, I know he did! Hattie always said it would be a match—now, it's very true when he came home to your house."

"Flora!" gasped Miss Maggie again, looking about her very much as if she were meditating flight.

"Well, she did—but I didn't believe

STOMACH TROUBLE? INDIGESTION?

Here's Good News For You

Lindsay, Ont.—Dr. Pierce's Golden Medical Discovery is the best medicine I have ever taken. I suffered from it for many years and I suffered with a gastric stomach trouble and indigestion. I took it. It would be so bad at times that it was necessary for me to be in bed two or three days at a time. I have doctored and taken many different medicines for relief. Just recently I began taking Golden Medical Discovery and it has given more relief than all the other medicines I have ever taken. My stomach does not bother me and I have not had any indigestion since taking this medicine. I can highly recommend the "Discovery" to others who suffer with stomach trouble."—Mrs. Geo. Wellington, John St. All druggists. Liquid or tablets.

Mrs. Fawcett Gives Advice to Mothers

St. Catharines, Ont.—"I took Dr. Pierce's Favorite Prescription during the winter with especially the need of a tonic and it benefited me greatly. I always take pleasure in recommending this 'Prescription' to young mothers because I know it will help. I have been taking Dr. J. H. Fawcett's 8 Beach St.

Your health is most important to you. It's easily improved. Just seek your nearest druggist for this Prescription of Dr. Pierce's in tablet or liquid form.

With Dr. Pierce, President Invadels' rated Buffalo, N. Y., if you want free medical advice.

it. Now I know. You refused him now—didn't you?"

"Certainly not!" Miss Maggie caught her breath a little convulsively.

"Honest?"

"Flora! Stop this silly talk right now. I have answered you once. I shan't again."

"Hm—." Miss Flora fell back in her chair, a little listless, then said, "I didn't, then, if you say so. And I don't need to ask if you accepted him. You didn't, of course, or you'd have been there to see him off. And he wouldn't have gone then, anyway, probably. You didn't ask you, I suppose. Well, I never did believe like Hattie did, that—"

"Flora!" interrupted Miss Maggie desperately, "will you stop talking in this way? I'm not a child. I don't care to go to the station today. I am very busy. I am going away next week. I am going—Chicago."

"To Chicago?" asked Miss Flora, came erect in her chair.

"Yes, for a visit. I'm going to see my old classmate, Nellie Maynard—Mrs. Tyndall."

"Maggie! What's the matter?"

"What? n—nothing. It's lovely, of course, but—oh, I—I'm so surprised! You never go anywhere."

"All the more reason why I should, then. It's time I did," smiled Miss Maggie. Miss Maggie was looking at me, at least, not at her.

"When are you going?"

"Next Wednesday. I heard from Nellie last night. She is expecting me then."

"How perfect, splendid! I'm so glad. And I do hope you can do it, and that it won't put you at the last minute, same's most of your good days do. Poor Maggie! And you've had such a hard life—and your boarder left you! I hope you will take a little difference in your pocketbook, won't it?" But, Maggie, you'll have to have some new clothes."

"Of course. I've been shopping this afternoon. I got a few—oh, lots of things."

"Of course you have. And, Maggie?" Miss Flora's face grew eager—please, won't you let me help you a little—about those clothes? And get me out of this mess?"

"All the time I did," smiled Miss Maggie.

"But, Maggie, you'll be looking at me again."

"Thank you, no, dear," refused Miss Maggie, striking her hand with a smile.

"But, I appreciate your kindness just the same—indeed, I do!"

"If you would not be so horrid horrid," pouted Miss Flora.

But Miss Maggie stopped her with a gentle smile.

"But, I never—listen! I have come telling to tell you. I was going to tell you, soon, anyway, and I'll tell it now; I have money, dear—lots and lots."

"You have?"

"Yes, father's Cousin George died two months ago."

"The rich one, in Alaska?"

"Yes; and to father's daughter he left—five thousand dollars."

"Aung-gah!"

"But I never even saw him! But I never—listen! I have come telling to tell you. I was going to tell you, soon, anyway, and I'll tell it now; I have money, dear—lots and lots."

"Thank you, no, dear," refused Miss Maggie, striking her hand with a smile.

"But, I appreciate your kindness just the same—indeed, I do!"

"If you would not be so horrid horrid," pouted Miss Flora.

But Miss Maggie stopped her with a gentle smile.

Join Says Views On Tariff Have Not Changed In Twenty Years

"Ghost" Run to Earth

Mystery of Haunted House in Nova Scotia is Solved

Halifax.—"The fires were produced by the physical means of the hands of the girl of the family (Mary Ellen), as shown by marks left in the building. She was not, however, morally culpable owing to having been in an altered state of consciousness. There is the added possibility, supported by a body of evidence, in other quarters, that this altered state was brought about by a disconcerting intelligence. This is a theoretical possibility, whereas the external facts seem certain. The experiences of Harold Whidden (Halifax newspaperman sent to investigate the story of the "ghosts"), and P. O. Carroll (a Halifax private detective), were probably of a super-normal character, which does not necessarily imply that the super-normal cause was spiritualistic. It may have been owing to a psychological cause which is perfectly natural though as yet imperfectly known."

Dr. Walter Franklin Prince, director of the American Society of Psychological Research, so summed up the results of his investigation that the fires and other mysterious happenings which drove Alex. Macdonald and his family from their home at Caledonia Mills, Antigonish County, during the winter.

Ottawa.—It was an eagerly expected and again a crowded House which heard Mr. Lomer Gouin, minister of justice. No member of the Liberal administration has aroused more interest than the former premier of Quebec.

He has already been attacked by the leaders alike of the official Opposition and the Progressives.

Mr. Meighen, Sir Lomer himself arrived in the House, "has taken a sure, particular pleasure, in designating me the master of the administration."

The Liberal party, Sir Lomer added, "has one chief only, chief is the Prime Minister of Canada."

But on the address had been swaying a torpid course. But, immediately Sir Lomer Gouin arose, and houses and doors filled rapidly.

In the Speaker's left, interest in the speech was especially keen. Progressive members, in particular, closely followed every word. There were Liberal cheers again and again during the speech and, as Sir Lomer stressed the intention of the Government to give public ownership of railways a fair trial, a number of Progressives joined in the Liberal applause. There were those on the Government side, Sir Lomer frankly admitted, who did not believe state ownership to be either practical or profitable. But he could not understand why Mr. Meighen should be suspicious of the good faith of the Government or any of its members.

"Mr. Meighen," Sir Lomer observed, "has allowed himself to be blinded by his bitterness against the city of Montreal and against the province of Quebec. He is a good fighter, but a poor loser. But—Sir Lomer's voice took an ironical tone—he will have an opportunity to learn. Mr. Meighen says he was defeated by the big interests of Montreal. The power that defeated his government was the will of the people."

On the tariff, Sir Lomer declared that now, as for the last 15 years, he favored the Laurier-Fleming policy. In the general election he told his electors that, if returned to power, Liberals would remain true to that policy.

Indian Agitators Arrested
London.—Well known agitator named Thakur has been arrested at Nairobi, British East Africa, charged with organizing meetings and spreading propaganda among the Indians there, says a Central News despatch. A form of propaganda which has caught the Indian imagination and is being widely carried out there, says the despatch, consist of daily public prayers asking that sanity be granted the British ministers.

Whiskey In Cars

With Race Horses

Trainer Declares Liquor Needed for Training Purposes

Buffalo, N.Y.—Fifteen race horses en route from Waterloo, Ont., to Maryland, were seized by Federal officials when several cases of whiskey were found in the cars in which the horses were being shipped. The horses are owned by Joseph E. Seagram, who also owns a distillery at Waterloo, Ont.

William Brinley, trainer, was arrested on a charge of unlawfully importing liquor. He was released at \$1,000 bond for a later hearing. At his arraignment Brinley told the Federal commissioners that it was necessary to give race horses whiskey as part of their training.

No Medals for Home Services

London.—An announcement in the House of Commons that the army council had decided not to grant medals for home services during the war, was received with cheers. The Secretary of State for War, Right Hon. Sir L. Waddington-Evans, was reminded that special constables had received medals, and he replied that they were not army medals.

Another Boy Wonder

Paris.—Twelve games of chess was played simultaneously by A. A. Alekhine, the young Russian chess master, without looking at the chess board, the moves being called. He won eleven of these games. The other resulted in a draw. It was announced that he would challenge Capablanca, the world's champion.

Visit Mining Area

Prince Rupert, B.C.—Steel interests in Prince Rupert are represented in a party which is exploring the mining areas at Stewart and Anyox, B.C. C. L. Drury, general manager of Sanderson Brothers, Toronto, is representing the Sheffield people.

Backache

Backache is the outstanding symptom of kidney disease. Women often make the mistake of attributing other causes and overlook the derangement of the kidneys until serious developments have made it difficult to obtain permanent relief.

This letter points to a treatment which has been so thoroughly tried and proven so effective in the great majority of cases that you cannot afford to overlook it when cause arises for its use.

Mr. Albert Brunet, R.R. No. 1, Ottawa, Ont., writes:

"I have used Dr. Chase's Kidney-Liver Pills for the past two months, having been afflicted with kidney trouble. I used two doctors' medicine previous to this, without any good results. A friend told me to try Dr. Chase's Kidney-Liver Pills, and the results have made me feel a good deal better. I have now used about six or eight boxes, and am completely relieved."

Dr. Chase's Kidney-Liver Pills, one pill a dose, 25c a box, all dealers, or Edmanson, Bates & Co., Limited, Toronto.

W. N. U. 1112

EGYPT HAS BECOME INDEPENDENT STATE

"KING OF EGYPT" WILL BE SULTAN'S NEW TITLE

Cairo.—A receipt issued by the Sultan Ahmed Fund Pasha announced that Egypt had become an independent and sovereign state and that the Sultan will assume the title of King of Egypt.

A Cairo despatch to the London Times last week said the Sultan was expected to assume the title of King upon ratification by the British Parliament of the decision to terminate the protectorate over Egypt. The new constitution with which Egypt will be provided, however, calls for renunciation by the Sultan of some of his prerogatives. The British Parliament has not yet passed an act lifting the protectorate.

London.—An Exchange Telegraph despatch from Cairo says the decision of Egypt's independence was followed by several demonstrations in the cities smashing street lamps and uprooting trees. Egyptian cavalry was ordered out to restore order.

Limit Reached In Armament Reduction

Britain Has "Scrapped to Bone" Says Lt.-Col. Amery

London.—Lt.-Col. Leopold Amery, parliamentary and financial secretary of the admiralty, in presenting the naval estimates in the House of Commons, said the savings resulting from the Washington conference would amount to £15,200,000.

"We have reached the limit," he said. "Things have been scrapped to the bone. Only a further fall in prices or possibly other navies following up the Washington conferences by a more advanced policy in the reduction of armaments can make possible additional economies in subsequent years."

Colonel Amery said Great Britain had by her power to keep the sea highways open and free and would never surrender, even to her best friend. He said it had been agreed at Washington to accept equality with the United States and the equality was not competition but co-operation for maintaining the world's peace. But, even for purposes of such co-operation, he declared, Great Britain could not afford to be less than equal.

He read about Dodd's Kidney Pills and what they had done for others, so sent and got six boxes. They did not help him, so he stopped taking the pills. Now he is not even tired of telling of the benefit she received from the use of Dodd's Kidney Pills.

Woodstock, Ont.—(Special)—Mrs. Jean Stanton, who is on R. R. 1, near Woodstock, has never tired of telling of the benefit she received from the use of Dodd's Kidney Pills.

About four years ago I had rheumatism in my left arm," Mrs. Stanton said. "It was so painful I couldn't dress myself."

She read about Dodd's Kidney Pills and what they had done for others, so sent and got six boxes. They did not help her, so she stopped taking the pills. Now she is not even tired of telling of the benefit she received from the use of Dodd's Kidney Pills.

Dodd's Kidney Pills are the best known and most reliable of kidney remedies. They heal the kidneys. Sound kidneys strain all the toxic substances from the body.

Ask your neighbors if Dodd's Kidney Pills do not make healthy kidneys.

China's Trade Outlook Considered Serious

Business Conditions Paralyzed By Strike of Seamen

Victoria, B.C.—Trade depression is noticeable throughout the Orient, and in China, the outlook is serious, according to F. W. Peters, general superintendent of the Canadian Pacific Railway, British Columbia division, who reached home from Hong Kong by the liner Empress of Russia.

Business conditions in China were virtually paralyzed by the strike of Chinese seamen at Hong Kong, said Mr. Peters. The Chinese Guilds have control, and now include all branches of Chinese labor. In Japan, Mr. Peters found competition keen. Much shipping, however, is tied up, owing to lack of cargoes.

Holding Up Seed Loans

Defeat of Manitoba Government Creates Awkward Situation

Winnipeg.—Applications for seed grain loans are being received in considerable numbers from rural municipalities by the Manitoba Government, whose members feel that following defeat of the administration they have no authority to incur the financial obligations involved in meeting the situation.

Unless steps are taken immediately it is said that thousands of acres of land in Manitoba will not be seeded this year as the result of the inability of farmers to purchase seed.

Will Revive Demand

Victoria.—Now that the province of Quebec has been given control of its fisheries resources, British Columbia's long standing agitation for the same concession is likely to be revived, local cannery operators say.

Think Farmers Will Win in Manitoba

Ottawa.—C. H. Burnell, president of the United Farmers of Manitoba, who is in Ottawa as a member of the delegation in regard to the re-establishment of the wheat board, informed the Canadian Press that he had no doubt that the United Farmers would control the next Manitoba Legislature.

Sir H. Samuel Improving

Jerusalem.—The condition of Sir Herbert Samuel, high commissioner for Palestine, has greatly improved, a bulletin from Government House states. The communication adds that the High Commissioner is out of danger.

Proposed Plans To Increase British Army By Further Enlistments

WESTERN EDITORS

R. W. Tuckwell, Editor of The Sentinel, Pilot Mound, Manitoba.

Favors Wheat Board

Moose Jaw Member Deals With Problems of Grain Marketing

Ottawa.—Debate on the address saw participants from Ontario and the West. R. M. Johnson, Progressive, Moose Jaw, thanked the Government for the reforms promised in the speech from the throne, even though, as set forth, they left a good deal to the imagination. He expressed the hope that the business barometer would continue to rise and that the improvement would be permanent. Business conditions in the West had been adversely affected by the tariff restriction in the United States. This had been very serious for the live stock industry, though not so much for grain growing.

The people of Canada were not responsible for the imposition of these restrictions, but he wondered whether those restrictions would have been imposed if the Canadian people had accepted the measure of freedom of trade which was offered to them in 1911. (Liber. applause).

Dealing with the problem of grain growing, grading and marketing, Mr. Johnson said that the greatest blow to Western agriculture was the greater production campaign of 1918.

The farmers had despaired to respond to that appeal and to raise as large crops as possible. But nature could not be driven and when an effort was made to do so, the result would not be what was expected, while future returns would be handicapped. The present system for the physical handling of grain could not be, he thought, bettered, but he was speaking, he believed, for all in his section of the House when he said all opposition to the establishment of a wheat board had not been swept away.

Mr. Winfield Dill, now of Windsor, N.S., was living in Halifax at that time and went through this trying experience and the shock wrecked his nerves. Since then he has followed the events in Halifax at the time of the explosion, and it wrecked my nerves so that I could not do my housework. I would take such nervous shocks and would recommend our

MBURGH'S HEART AND NERVE PILLS

MBURGH'S HEART AND NERVE PILLS

as the best remedy to cure the nervous system and strengthen the weakened organs.

MBURGH'S HEART AND NERVE PILLS are the original heart and nerve food having been on the market for over 25 years.

NICE-A

Make it your handy household assistant. Use it for making soap, in washing dishes, for cleaning sinks, refrigerators, garbage cans, etc., for cleaning clogged drain pipes, for removing grease and smoke stains, for scrubbing floors and tiling. You will find that the systematic use of Gillett's Lye will keep everything around the kitchen and bath room clean, sweet and wholesome. Cleans and disinfects. Is economical and sure in its effects. Has been the standard for over 50 years. It saves labor, time and trouble.

Made in Canada

OLD HAPPENINGS
BRIEFLY TOLD

been decided to adopt day
for the city of Montreal,
will be put ahead an hour
and back an hour on Oct. 1.

B. Robertson, pioneer Dau-
ther and proprietor of the Bon
Arche store, is dead at the age of
75. He was born in Scotland and came
to Dawson many years ago from
Scotland.

Working in a blinding snowstorm
and with the thermometer near zero
robbers tunneled into the vault of
the Piedmont State Bank at Piedmont,
Kansas, and stole liberty bonds be-
haved to total \$50,000 in value.

The Fernanagh Assize Court sen-
tenced three men described as leaders
to 10 years' penal servitude for parti-
cipating in the recent kidnapping
raids in Ulster. Eight others were
given sentences ranging from five to
eight years.

Baron Manton, of Compton Verney,
was thrown from his horse and killed
while fox hunting near Stratford-on-
Avon. Lord Manton formerly was
Joseph Watson, head of a big soap
firm. He was elevated to the peerage
at the new year for his war ser-
vice and philanthropy.

Reduction of the size of the United
States regular army to 115,000 en-
listed men has been tentatively agreed
upon by the sub-committee which is
drafting the army appropriation bill
at Washington. The present strength
of the army is approximately 137,000
men.

A Hundred Dollars Worth
For Thirty-Five Cents

When you are awakened without a
sound sleep by Cramps, when without
a moment's warning pain springs
upon you, it's then you would readily
pay a hundred dollars for the quiet
rest you would secure from a forty-
five cent bottle of Nervilene on New
line. Nothing like Nervilene to re-
lieve cramps, stomach gas, diarrhoea
and kindred ills. Nothing better for
Nervilene in the head and sore
throat. The price of Nervilene is
thirty-five cents, no more, no less, in
all stores, where medicines are sold.

Increases in Saskatchewan Cattle
Cattle in Saskatchewan in 1921
numbered 1,563,332, an increase of
339,230 over the number of 1920, ac-
cording to a report of the Provincial
Department of Agriculture. It is in-
teresting to note that the greatest in-
crease is in milk cows, which now
number 421,706, or 70,000 more than
in the previous year.

Moving a Mountain

Task Undertaken by Engineers in Rio
de Janeiro

Moving a mountain is the huge task
undertaken by engineers in Rio de
Janeiro, where the Morro do Castello—
consisting of an estimated 7,000,000
cu. yd. of earth and rock—is being
obliterated, the completion of which is
expected to make the southern metro-
polis much more breezy, cool and
healthful, besides adding some 66
blocks to the heart of the city. Various
methods have been tried in the
transporting of this mass from its
present location and depositing it in
the bay, among these being pick and
shovel, mule cart, steam shovel, and
"dinky or dummy train," all of which
are described with full illustrations in
the April Popular Mechanics Maga-
zine. The presence of an old con-
tent on the summit of the mountain
has given rise to the rumor that gold
is hidden near it, and caused added
distrust among the credulous workmen.

Dye Any Garment
Or Old Drapery
In Diamond Dyes

Buy "Diamond Dyes" and follow the
simple directions in every package
bottle. You will be perfectly satisfied
successfully, because perfect home
dyeing is guaranteed with Diamond
Dyes. They are made from the finest
Worn, faded dresses, skirts, waist, coats,
etc., are easily renewed. Dyeing
everything, become like new again. Just
tell your druggist whether it is new or old,
whether it is linen, cotton or mixed
goods, or rags. Diamond Dyes never streak,
spill, or run.

Rent for Fighting Ground

A Viewpoint on the Question of Pay-
ing France for Use of Docks

Great Britain, it appears, paid

France the huge sum of 22 million

pounds as rental for docks, buildings

and trenches used or occupied in

connection with the British military

operations in the recent war. A critic

suggests that this is the first instance

on record of one country paying rent

for trenches in which to fight to de-
fend the country owning the ground.

That is not a candid statement of fact.

Britain was not fighting France's battle,

but its own. That it did

fighting in France, and not in Britain,

was a piece of good fortune for which

even the sun cited is a cheap price.

It is likely, too, that the British au-
thorities saw in this means a way to

give some financial help to a hard-
pressed ally whose sense of independ-
ence would not permit it to accept a

straight gift.—Edmonton Bulletin.

The reason a prophet has no honor
in his own country may be because
we are tired of hearing him say "I
told you so."

Novel Auto Truck
For Delivering Bricks, a motor
truck has been designed with a body
that travels in such a way as to unload
its contents neatly piled.

CHILDHOOD CONSTIPATION

Constipation—that disordered state
of the digestive tract which is nearly
always caused by improper feeding
can be easily remedied with the use of
Baby's Own Tablets. Those Tablets
are a mild but thorough laxative.
They are easy to take and are absolutely
free from injurious drugs. Containing
the famous Dr. Joseph Dionne
Perpetue, Que., writes: "I have nothing
but praise for Baby's Own Tablets.
When my baby was three months old he was terribly constipated
and now at the age of fifteen good
he is a big healthy boy and this good
health is entirely to the use of
the Tablets." They are sold by
medicine dealers or by mail at
one cent a box from The Dr. William
Medicine Co., Brattleboro, Vt.

Oldest Post Office in United States

Building at St. Augustine, Florida,
Was Erected in 1563

Erected in 1563, the post office
building at St. Augustine, Florida, is
believed to be the oldest structure of
the kind in the country. According
to official records in the "Archives of
the Indies" at Seville, Spain, it was
purchased by the King of Spain in
1604 from Gonzalo Mendoza, former
governor of Florida, who erected it
for \$10,000 as a residence for Gov.
Pedro De Yslera and his successors.

In requesting that the purchase be
made, Gov. Yslera wrote the king that
the house in which he lived was
built over the hills, and was so cold
and damp that two former governors
had died in it.

Mother, Quick! Give

California Fig Syrup
For Child's Bowels

Even a sick child loves the "fruity"
taste of "California Fig Syrup." If
your child is constipated, or has a cold,
or has colic, a teaspoonful will
never fail to open the bowels. In a
few hours you can see for yourself
how quickly it works. It is
a宫殿 of nutrition, your life and vitality
from the tender, little bowels and gives
you a well, playful child again.
Millions of mothers keep "California
Fig Syrup" in their medicine cabinets.
It is a宫殿 of nutrition, your life and vitality
from the tender, little bowels and gives
you a well, playful child again.
It is a宫殿 of nutrition, your life and vitality
from the tender, little bowels and gives
you a well, playful child again.

A Simple House.

Dress of Gingham

By Marie Belmont

The season is approaching when
every particular housekeeper wants
an attractive dress to wear about her
duties indoors. The modern trend is
for bright effects and gay colors in
frocks of this type, and the example
above is charming in red-cheeked
gingham.

The square cut neck is flanked at
either side by the yoke, and to this
the waist is slightly fulled at the
shoulders. Here and there the skirt
joins the blouse at the lowered waist.
Black wool embroidery imparts
a striking note. A slender black
patent leather belt finishes the costume.

The same frock may be made up in
cotton, crepe or handkerchief linen
for dresser occasions.

The Oil of the People.—Many oils
have gone, but Dr. Thomas' "Saponin
Oil" still remains in the spheres of usefulness
each year. Its sterling qualities
make it a valuable preventive against
the Oil of the People. Many
people have been saved by its use
in the prevention of the Oil of the People.
It is a宫殿 of nutrition, your life and vitality
from the tender, little bowels and gives
you a well, playful child again.

It is goodnight for the tight robe
when he steps from the
straight and narrow path.

It is goodnight for the tight robe
when he steps from the
straight and narrow path.

It is goodnight for the tight robe
when he steps from the
straight and narrow path.

It is goodnight for the tight robe
when he steps from the
straight and narrow path.

It is goodnight for the tight robe
when he steps from the
straight and narrow path.

It is goodnight for the tight robe
when he steps from the
straight and narrow path.

It is goodnight for the tight robe
when he steps from the
straight and narrow path.

It is goodnight for the tight robe
when he steps from the
straight and narrow path.

It is goodnight for the tight robe
when he steps from the
straight and narrow path.

It is goodnight for the tight robe
when he steps from the
straight and narrow path.

It is goodnight for the tight robe
when he steps from the
straight and narrow path.

It is goodnight for the tight robe
when he steps from the
straight and narrow path.

It is goodnight for the tight robe
when he steps from the
straight and narrow path.

It is goodnight for the tight robe
when he steps from the
straight and narrow path.

It is goodnight for the tight robe
when he steps from the
straight and narrow path.

It is goodnight for the tight robe
when he steps from the
straight and narrow path.

It is goodnight for the tight robe
when he steps from the
straight and narrow path.

It is goodnight for the tight robe
when he steps from the
straight and narrow path.

It is goodnight for the tight robe
when he steps from the
straight and narrow path.

It is goodnight for the tight robe
when he steps from the
straight and narrow path.

It is goodnight for the tight robe
when he steps from the
straight and narrow path.

It is goodnight for the tight robe
when he steps from the
straight and narrow path.

It is goodnight for the tight robe
when he steps from the
straight and narrow path.

It is goodnight for the tight robe
when he steps from the
straight and narrow path.

It is goodnight for the tight robe
when he steps from the
straight and narrow path.
